

FOR IMMEDIATE RELEASE:

11/4/13

Leading Integrated Marketing and Technology Services Company, D3, Inc Receives SSAE16 Designation

East Providence, RI. – November 4, 2013 – D3, Inc., an industry leader in marketing communications and the critical document business process outsourcing market, announces today that the company has received the coveted SSAE 16 Certification. The Statement on Standards for Attestation Engagements (SSAE-16) is a designation that replaces SAS 70 as the authoritative guidance for reporting on service organizations for internal financial controls and processes for critical and sensitive document management. SSAE 16 was formally issued in April 2010 with an effective date of June 15, 2011.

SSAE16 is the service auditors report that outlines the widely accepted compliance initiative that provides service organizations a benchmark to compare their internal controls and processes against industry best practices.

As a SSAE16 designated partner, D3 adheres to a stringent series of operative principles to ensure their resources derive from well-managed, documented and audited processes. This certification demonstrates D3's continued support of best practices and their commitment to providing high quality, document management solutions for financial clients.

"Our SSAE16 designation further demonstrates our commitment to customer-focused operations. As a chosen document and technology services provider, we owe it to our customers to operate at the highest level with process integrity, efficiency and with the greatest care for our clients," says Ralph DelMonico, President of D3. "I am proud to participate in this highly respected and progressive SSAE16 certification program."
